

Energy, water and waste

- Always turn off computers, lights and appliances when you are finished. Close doors and windows when you leave the room.
- Reduce water use at college and home. Turn off taps, use a plug, take a shower, collect and use rain water.
- Be print-wise: if you must use paper, print on both sides and dispose of paper responsibly.
- Leave an empty plate; where practical, compost.

Set an example; inspire others to follow.
