

Tullis Matson

STALLION AI SERVICES

- Began his career with horses working in a racing stables, where he spent two years as Assistant Trainer to Phillip Hobbs. In 1990, he came home to run his father's non thoroughbred stud at Twemlows Hall.
- In 1993, he left for a study tour of New Zealand where he visited 17 studs and racing stables and returned home to begin practising AI for the first time.
- In 1996, Tullis started up Stallion AI Services Ltd, a Stallion Semen Collection Centre running from Twemlows Hall.
 - During the 18 years that stallion AI Services has been running, Tullis has frozen semen from some of the World's greatest stallions.
- In 2008, Tullis set up Equine Reproduction Supplies which is now the UK's largest distributor of equine artificial insemination equipment and in 2010, was given the exclusive rights to distribute the world renowned "minitube" products in the UK.
- In 2011, Tullis Matson received the Marsh Christian Award for Conservation in Genetic Bio-Diversity. He has been given the award for the technological advances he has brought to the field of equine semen freezing which has enabled some rare breeds to be collected from and frozen successfully for the first time.
